Process Flowchart

Tender and Commercial Operations :

We furnish our clients with all the information they might need to assess our suitability for the project at hand.. All prequalification Documents is furnished to provide an overview of our credentials.

CONTRACTS :

The management takes up the charge once we win a bid and puts together a thorough client requirement brief. It helps our entire team understand the client's needs and expectations. The brief is now ready for our value addition.

Planning & Project Management :

Projects are well planned & managed with most minute detail. We believe in planning with foresight, factoring in all the possible outcomes.

Procurement :

The quality of the final product is dependent on the quality of the raw material. We make no compromises on the quality of materials for all our projects. We procure good quality material from reputed suppliers, and maintain all documentation procedures.

Production :

We make use of our state of art CNC machines & Tools with good craftsmanship of its people. Hence we are proud to produce good quality work with in the stipulated time.

Quality control :

Our inspectors make sure that everything from raw materials to finished products meets quality and safety standards. All production processes stage inspections are done to ensure the buyer gets the right material and finish supplier.

Logistics :

All finished materials are wrapped and planned for delivering the goods to achieve your business goals by finding more innovative and cost-effective.

Quality & HSE Policies

The long-term business success of GGME depends on our ability to continually improve the quality of our services and products while protecting people and the environment. Emphasis are placed on ensuring human health, operational safety, environmental protection, quality enhancement, and community goodwill. This commitment is in the best interests of our customers, our employees and contractors, and the communities in which we live and work.

QHSE from all employees and contractors. Line management has a leadership role in the communication and implementation of, and ensuring compliance with, QHSE policies and standards. We are committed to

Protect, and strive for improvement of, the health, safety and security of our people at all times;

Eliminate Quality non-conformances and HSE accidents;

Meet specified customer requirement and ensure continuous customer satisfaction;

Set Quality & HSE performance objectives, measure results, assess and continually improve processes, services and product quality, through the use of an effective management

apply our technical skills to all HSE aspects in the design and engineering of our services and products;

This Policy shall be regularly reviewed to ensure ongoing suitability. The commitments listed are in addition to our basic obligation to comply with GGME standards, as well as all applicable laws and regulations where we operate. This is critical to our business success because it allows us to systematically minimize all losses and adds value for all our stakeholders.

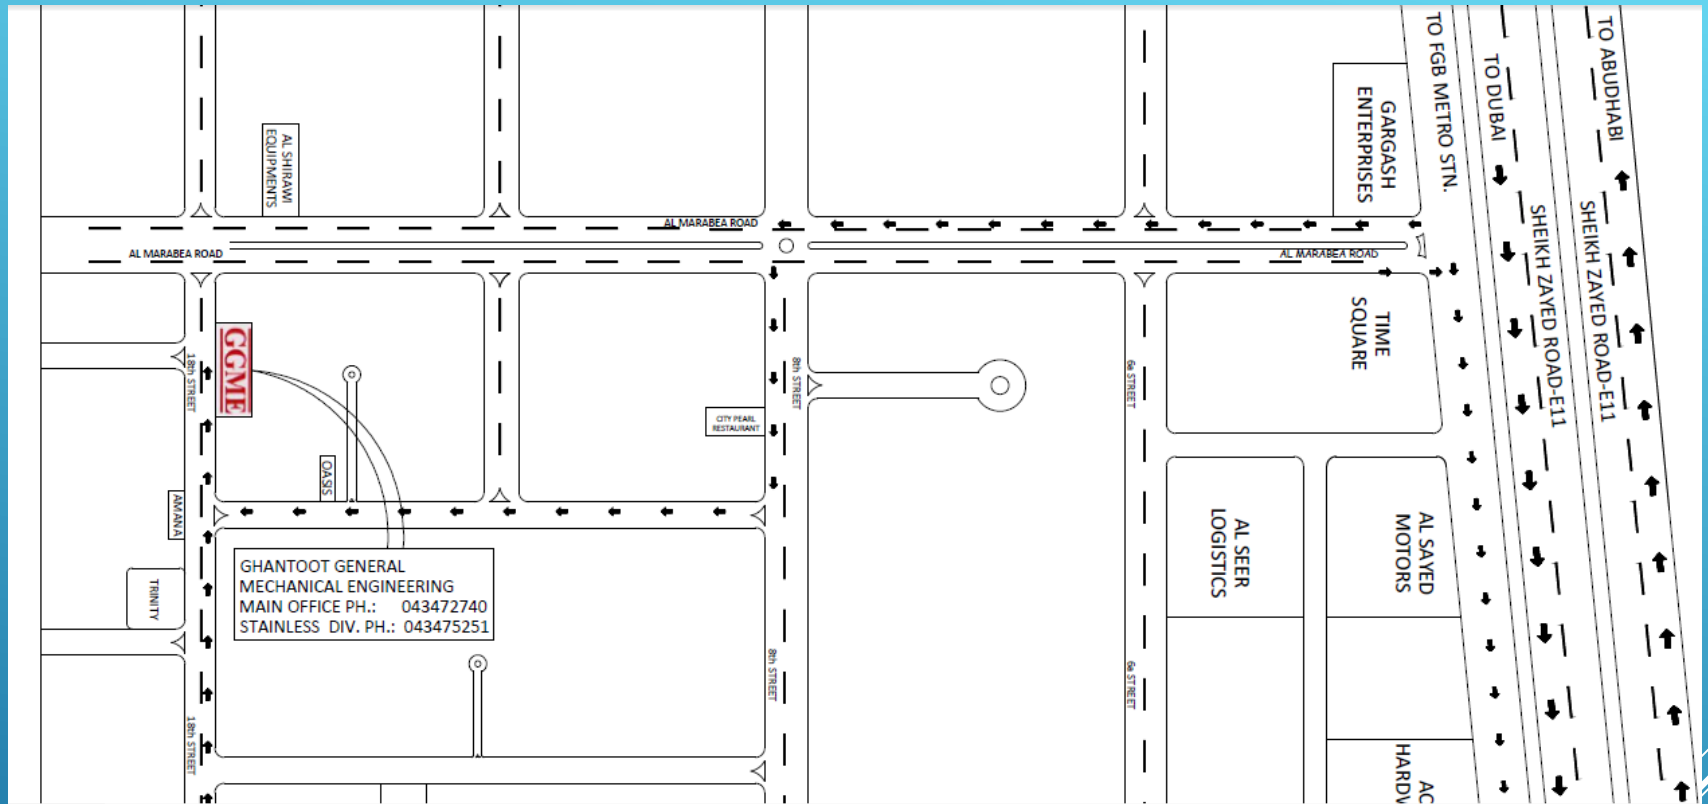

Sustainability:

Despite the increased popularity of the term "sustainability" that human societies will achieve environmental success,

At GGME we follow the process of designing and operating systems such that we use energy and resources in an efficient way in order to reduce the wastage, manage the materials, prevent pollution and enhance the product, to achieve the sustainability goal.
